Was project x an actual party

If you have stumbled upon Project X on the internet and you really did not know what it is. Well, you are in luck as this article will explain whether the Project X real story is the same as the American comedy film. There are variations of Project X on the internet but the type we are looking at is the one that involves a party. Was there a party thrown in the Project X real story or the movie adaptation? Who are those that feature in the film? What was the reaction of the fans like after seeing the film? All of these questions will be answered as you read through.
Image source The Project X Real Story? Well, if Project X is a real story, it is dicey. There are reports that it is based on a true story. You will get to know as you read on. However, there is one Project X that is linked to 1975. That’s not the crux of this article. The Project X film is directed by Iranian director Nima Nourizadeh. The film was released to critical acclaim in 2012. The story circles round three friends, Costa, J.B, Thomas. These friends planned to get famous by throwing out parties. However, the movie plot deepens as the plan to get famous turns chaotic. They found out they could get themselves out of the mess they had put themselves into. What’s Project X Based On? According to the popular TV network MTV, Project X is based on the true life story of a 16-year-old boy, Corey Worthington. He is tagged “Australia’s most infamous teenager.” Delaney organised a party. Then he took it a step further when he posted it on his social media website, MySpace. He didn’t envisage that 500 people would show up. Because the house was not that huge to take in everyone, chaos broke out. The partygoers got into a fight with the police. In literal words, pandemonium broke loose. Stones were thrown, a police car was destroyed. It took the efforts of cops who came with a helicopter and a dog squad to rescue the day. Project X Plot In the film, a young boy, Thomas Kub, planned on celebrating his eighteenth birthday with a small party. So, he invited his two friends Costa and J.B who he asked to convince their other friends to come for the party. These boys are all high school students in Pasadena. Unfortunately for Thomas, the number of people that showed up was way more than what Thomas had bargained for. Unknown to Thomas, Costa had put the party ads on Craigslist and even a local radio station, which explains the crowd. With a rich supply of marijuana and party supplies, there was actually everything in place. Knowing what usually happens when intoxicated young people are, pandemonium usually breaks out. Having a whole lot of young people partying hard means one thing if not controlled– fights. For Thomas and his friends, as the party got bigger and bigger, it got to a point where they couldn’t control the influx of people and their behaviors. As a result, the people got into fistcuffs with the police. The Cast and Crew Michael Bacall and Matt Drake joined heads together to write the hugely criticised movie. The movie was produced by Todd Phillips. The three main cast are Thomas (Thomas Mann), J.B (Jonathan Daniel Brown) and Costa (Oliver Cooper). Kirby Bliss Blanton played Kirby, Thomas’s best friend who has a crush on Thomas. Image source Responses to Project X Real Story Remake With an approval rating of 28% on Rotten Tomatoes, it appears that people did not buy into the idea and the production of the movie. Another site that rates films, Metacritic, Project X had 48 out of 100 scores. The many criticisms against the film include perceived misogyny, awful behavior of the characters. One Todd McCarthy of the Hollywood Reporter describes it this way: “It is grimly depressing, glumly unfunny teensploitation”, but admitted that it would “enthral a portion of the high school/college age demographic it depicts, just as it alternately outrages, confounds and disgusts other, presumably older audiences.” Read about the first black man to play football in the United States. It is an incredible story you should read. Read here Another critic echoes this same sentiment, Melissa Anderson of The Village Voice, said: “Skull-numbing hedonism without consequences and second-nature misogyny.” However, while there were gloating remarks, some critics find it quite funny. Pete Travers of the popular Rolling Stone believes that the film was “guts-bustingly funny.” All in all, the Project X film received mixed reactions while the bulk of the reactions were negative, the film has found a way to get attention. Image source Conclusion If the Project X real story is the same as the film, we have answered the question in this article. You can choose to watch if you think you want some teenagerish acting and escapades. Yusuke Kawasaki/Flickr Xacuti, xiaolongbao, ximenia, xocnostle and xpinec are just some of the foods that begin with the letter “X.” Because so few words begin with the letter “X” in English, all of these foods come from countries outside the United States. Xacuti This brown curry comes from the village of Arambol in the Indian region of Goa and is usually made with chicken or seafood. Xacuti is often served with rice, bread or even over an omelet. It can vary in spiciness. Ingredients include pepper, onion, white poppy seeds, fresh and dried chilies, turmeric, cinnamon, cloves, nutmeg and other spices. Xiao Long Bao A small (xiao) basket (long) bun (bao) is a steamed dumpling filled with broth and pork. Originally from Shanghai, China, xiao long baos can now sometimes be found in American Chinese restaurants in big cities like Chicago. Eating these dumplings can be difficult for people who haven’t tried them before. They are served in a bamboo steamer while extremely hot, making it risky to eat one too soon. However, the longer you wait for the xiao long bao to cool, the more likely it is that the bottom will tear, losing the delicious broth. To overcome these challenges, pick the dumpling up with chopsticks and place it on a soup spoon. (You may wish to add vinegar and ginger to the spoon beforehand for added flavor.) As the dumpling cools on the spoon, consider piercing the skin of the dumpling with a fork or your teeth to help it reach a safe temperature faster. Once a few minutes have gone by and the dumpling is ready, slide the dumpling (and any vinegar and ginger) into your mouth and enjoy. Ximenia Ximenia is the name of both a tree and its fruit that grows in countries such as Ethiopia, Tanzania and South Africa. Its English name comes from Francisco Ximenez, a Spanish monk. The fruit is orange or red with white spots and only slightly longer than an inch. The taste is bitter and tart. The skin should be peeled and discarded before eating, although the nut is edible. Ximenia fruit are used for jams, jellies, deserts and as a sweetener for porridge. They are also eaten raw. Additionally, the roots and leaves of the tree can be used for medicinal purposes, such as treating fevers or inflamed eyes. Xnipec The name of this fiery salsa comes from the Mayan words for “dog’s nose” or “dog’s snout,” probably because the heat of it will make your nose run wet like a dog’s. Xnipec is originally from the Yucatan Peninsula, the southeastern part of Mexico where Mayans still live today, but it has since made its way north of the border. The spiciness of this salsa comes from habanero peppers, so be careful when preparing and eating xnipec. Xocnostle Like Ximenia, Xocnostle is a fruit. It comes from a cactus that goes by the same name and grows in Central Mexico. It’s used in marinades, salsas, mole de olla and even beverages. Sometimes it’s also dried or candied before being eaten. The cactus itself is pale green, while the fruit is deep red and grows at the end of paddle-shaped growths. The taste of xocnostle is sour and acidic. MORE FROM REFERENCE.COM Directed by Nima Nourizadeh, ‘Project X’ is a 2012 found footage comedy that revolves around three North Pasadena teenagers — Thomas, Costa, and J.B. — and an all-night house party they host in a bid for popularity that quickly and disastrously spirals out of control. Produced by Todd Phillips (‘The Hangover’) and written by Michael Bacall (‘21 Jump Street’) and Matt Drake, the movie is shown from the perspective of AV student Dax’s unsteady camera, as he wanders around recording the crazy events of the night. Despite the over-the-top and explicit nature of its content, ‘Project X’ seems believable to anyone who has heard of, or attended, destructive but euphoric drug-and-testosterone-fueled high school parties. In case you’re wondering about its origins, we have got you covered. Let’s find out whether ‘Project X’ is based on a true story. Is Project X a True Story? ‘Project X’ is partially based on a true story. The teen comedy seems to draw inspiration from Corey Worthington, AKA “Australia’s most infamous teenager,” who, at the age of 16, threw a party when his parents had gone out of town on vacation in 2008. Having posted the party invitation on his MySpace account, Worthington attracted around 500 partygoers looking for a good time at his doorstep. What ensued was pure chaos — the noise levels went off the charts, and a neighbor’s property was damaged. Stones were pelted, a police car was vandalized, and reinforcement from the cops came in the form of a helicopter and a dog squad. Needless to say, Worthington’s story hit the news worldwide. The parallels between Worthington’s story and ‘Project X’ are obvious. Costa throws an 18th birthday party for Thomas not out of the goodness of his heart but to get the trio a chance to score girls, drugs, and fame. In addition, Marijuana and ecstasy fuel the partygoers, and a dog is set afloat in the air after being tied to balloons. Thomas’ dad’s expensive car is driven into the pool, and his house is set on fire by an angry drug dealer. Over-the-top, much? Well, it was intentional. “[Movies like this become] A compendium of a lot of people’s different experiences asked, you know, exaggerated,” said Todd Phillips, on the experiences that inspired the plot. The unknown faces in the movie definitely help sell its found-footage format and claims to realism, as the possibility of the story being anyone’s is championed. Talking about why the deliberate choice of not casting known faces for the comedy was made, Phillips added, “It wouldn’t seem authentic.” While the found footage genre is most commonly associated with paranormal and horror movies, ‘Project X’ attempts to play around with the concept while exploring the extreme highs and lows of a teenage party gone wrong (or right, depending on who you ask). The movie attempts to mimic the cinéma vérité style, wherein the cameraman observes and encourages the stories of those being recorded. Dax’s unsteady camerawork convincingly sells the idea that such a party can happen and has happened. Moreover, the extras were given handheld cameras and flip phones to ensure a range of POVs and differing camera qualities, portraying the reality of teenagers wanting to record anything and everything in their path. Even the police dashcam footage adds to the horrifying possibility of such a party being real. “It’s all very, very real, actually,” said Kirby Bliss Blanton, who plays Kirby, on how the crew and extras ensured that the footage recorded allowed for a sense of natural movement and realistic chaos. “Nowadays everyone’s got some sort of video recording device on them at all times so it’s believable that we would get all these different angles at this party,” opined Thomas Mann, who plays the host Thomas. The remorse-free teenagers at the end of the movie, who don’t actually get to pay for the consequences of their actions in any meaningful way, may seem a tad bit unrealistic to viewers. However, Worthington was just as, if not more, nonchalant about his real-life destructive party. “Get me to do it for you. Best party ever so far,” said a guilt-free Worthington, upon being asked what he’d say to other teenagers looking to throw a party in their parents’ absence. Clearly, the perspective through youth-tinted glasses is heavily skewed. Moreover, the event was actually beneficial for Worthington as it gave him instant celebrity status, even scoring him an agent who began to book him for parties in Australia and Britain. In the movie, Thomas too attains notoriety at his high school, with media coverage of his party only bolstering his newfound popularity. In fact, the end of the movie sees Costa being interviewed by a news reporter. His getup and attitude remind viewers vividly of Worthington’s own demeanor in his infamous interview with ‘A Current Affair.’ The movie certainly captures the recklessness and devil-may-care attitude of high schoolers who think their youth allows them to proudly make mistakes, commit crimes, and ultimately get away with it all. The highly stylized movie doesn’t pass moral judgments, simply aiming to present an exaggerated version of a party dictated by the party teenagers. All the footage is presented as though it were discovered and not meticulously put together, and this element of authenticity allows viewers to get entertained and repelled by the teen comedy. Movies like ‘American Pie,’ ‘21 Jump Street,’ and ‘Superbad,’ too, chronicle the simultaneously fascinating and frightening world of teenagers. The R-rated film doesn’t attempt to glorify the chaotic party — it simply presents the party as it is, through the eyes of its sexed-up, drug-happy, property-damage-loving high schoolers. While the outrageous and frankly concerning characters and incidents of Thomas’ party in ‘Project X’ might be fictitious, it is a known fact that many such personas and parties can exist and have existed in real life. Worthington is living proof. Read More: Movies Like Project X
